

# Evolving Christianity

Using scientific thinking to evolve  
Christianity to fight racism and  
other social diseases

Paul Shepherd

## DISCUSSION GROUP FOR THE BOOK

### Evolving Christianity

by Rev. Paul Shepherd

This book takes a reflective - and scientific - look at Christianity and asks the simple question - "Can Christianity be made to work better today fighting racism and sexism". The answer is of course, yes!

The book develops 6 Christian First Principles and argues that Christianity today should work to uphold those principles not only in word, but in action.

The 6 Principles are then tested against real-world problems that we face today.

The book is available at the Five Oaks book store, on Amazon (paperback or e-book), or from the trunk of Rev. Paul's car.

Meetings will be online, starting at 7 pm. Meeting links are on the church calendar @ [sydenham-heritage.ca](http://sydenham-heritage.ca) (home page, scroll down).

*All are welcome!*

Date	Focus for the week
Jan 11, 2021	Setting the stage: Introduction and Part 1
